

GAS WATER HEATER

ONDA OF Instantaneous natural draught water heater

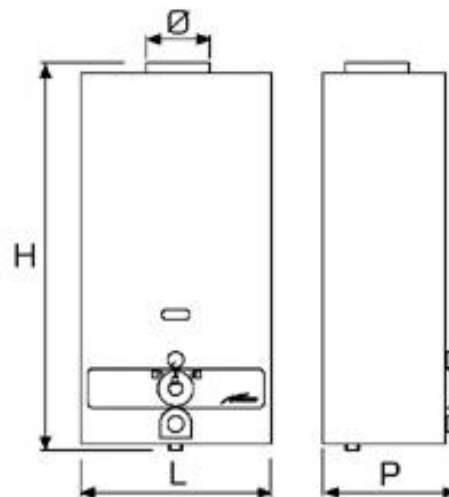

Onda OF is the instant gas hot water heater with variable heat power provided by a gas modulation valve that really cuts down on energy consumption. It is available in the natural draught version with outputs from 18,0 to 29,5 kW. A temperature selector lets users adjust water temperature according to flow and an exhaust control device shuts down operation when draught malfunctions. Onda OF is distinguished for automatic ignition and battery power that permits installation without electrical

Why choose Onda OF

- It does not connect to the electrical mains and is ideal for replacing pilot flame solutions.
- Onda OF is equipped with a gas economizer that can limit equipment power by 50%, useful, for example, in summer
- ✓ **Instantaneous natural draught water heater**
- ✓ **Variable thermal power**
- ✓ **Electronic device powered by a 1.5V battery (does not need plugging in)**
- ✓ **Modulating**
- ✓ **Temperature selector and gas economizer**
- ✓ **Supplied with water connection elbows**
- ✓ **Smoke safety device**
- ✓ **CE Marked**

Also available gas heaters for central heating and hotels
